How to integrate bot into Shopify Site:

1. Log in Shopify Site Admin page
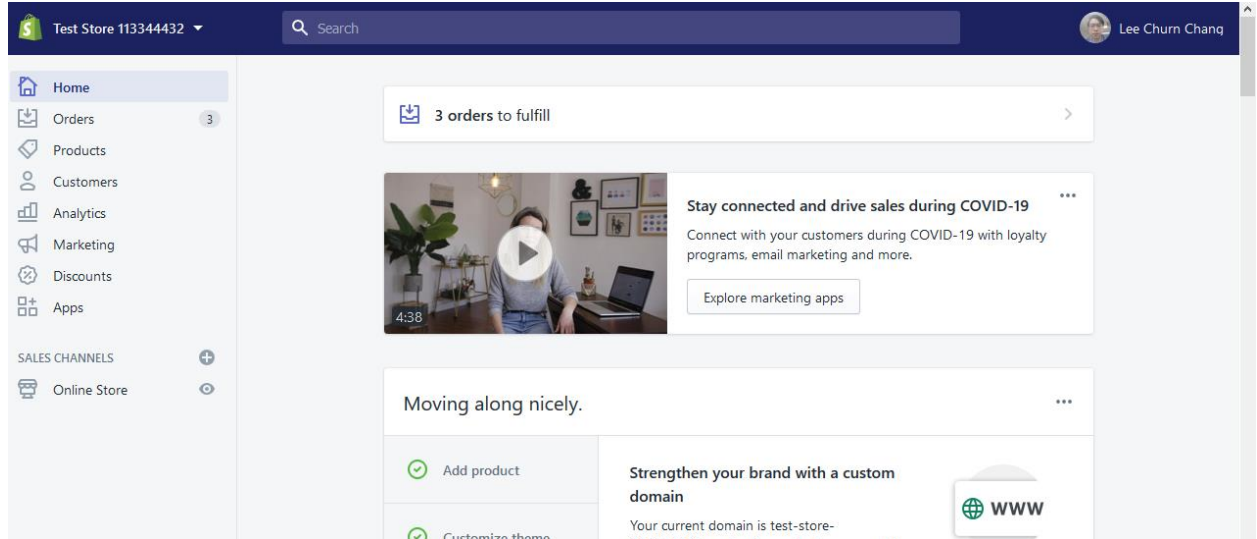

Figure 1. Shopify Admin page
Eg. if the site name is https://test-store-113344432.myshopify.com/
The Admin URL should be https://test-store-113344432.myshopify.com/admin/
Figure 1 shows Shopify Admin page looks like.

2. Click on "Online Store" located below "SALES CHANNELS"

3. Click on "Actions" dropdown list choose "Edit Code". (Figure 2(a))

Figure 2 (a) "Action" dropdown menu.
(Note : Please make sure the "Themes" menu is selected on the left navigation bar. Shown in Figure 2 (b))

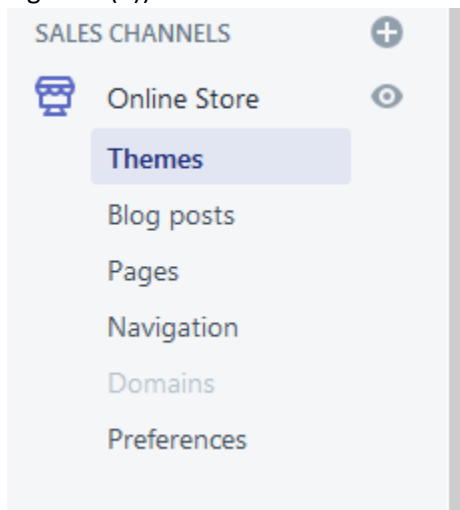

Figure 2 (b). Ensure that "Themes" is selected.

4. Click on "theme.liquid" which is located under "Layout" folder

Figure 3. Look for the "theme.liquid"

5. Look for the part which has "<main class="main-content js-focus-hidden" id="MainContent" role="main" tabindex="-1">"

Paste the following code after " {{content_for_layout}}" but before "</main>"

```
<script src="https://wannatalk.ai/Scripts/jquery-1.10.2.min.js"></script>
        <script src="https://wannatalk.ai/scripts/jquery-ui.min.js"></script>

    <table border="0" width="100%" cellspacing="0" cellpadding="0">
        <tr>
                <td>
                <p align="center">
                <img border="0" src="sample.png" width="100%" height="auto"></td>
        </tr>
    </table>

<script src="https://wannatalk.ai/api/js/smassist5.js?apikey=276279" domain="https://wannatalk.ai"
 id="wtsrclc" apikey="276279" userToken="" email="" dispName="" async defer></script>
```
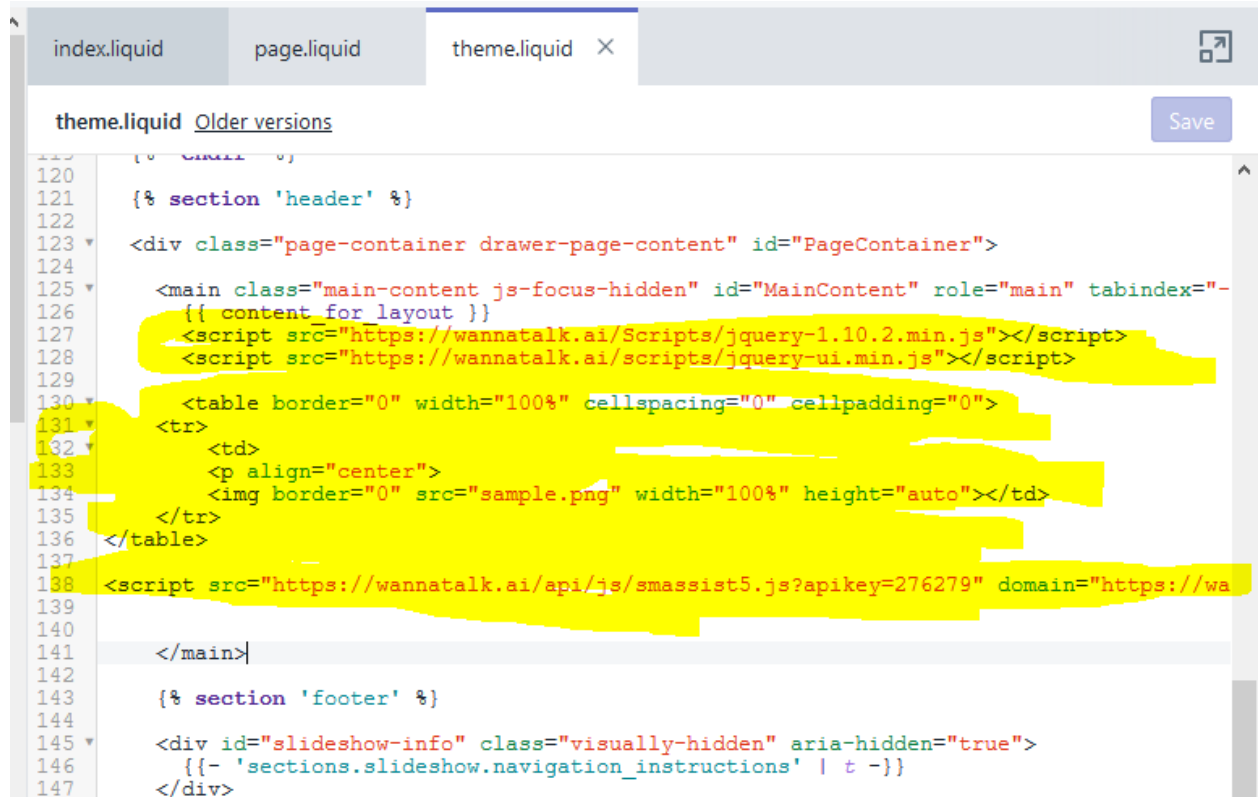

The end result will look like Figure 4.

Figure 4 : Pasted code in "theme.liquid"

6. Click "Save".
7. The chatbot will appear on the lower right on the website as shown in Figure 5.

Figure 5. Chatbot window on the lower right on the website.

How to create Shopify App

1. Log into Shopify Partners Account at the URL below:
   https://www.shopify.com/partners
   (Note : Registration is free)
2. Click on "Apps" on left menu , then click "Create App" on the main screen, refer Figure 6.

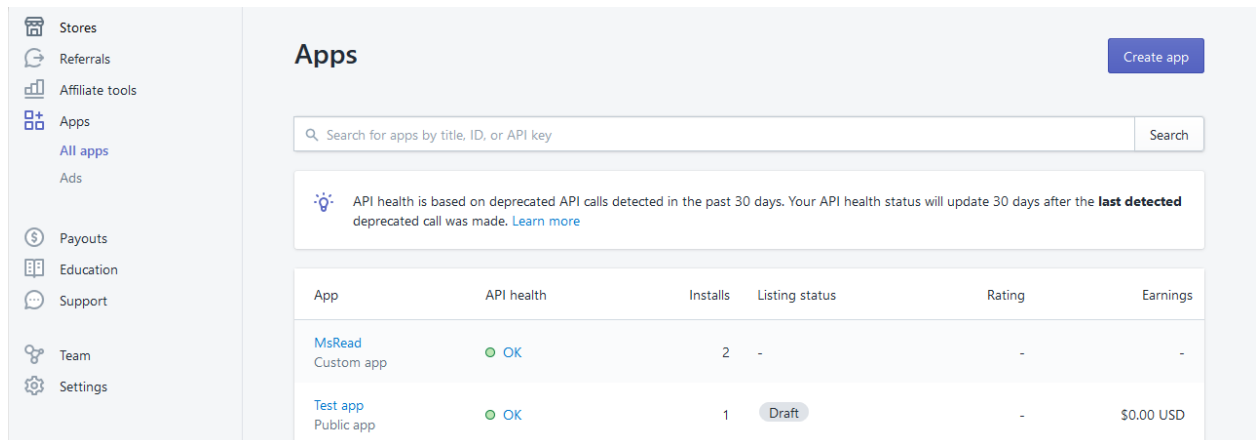

Figure 6 . App creation screen.

3. You will be shown with 2 options, Custom App and Public App. Click on Custom App. Refer Figure 7.

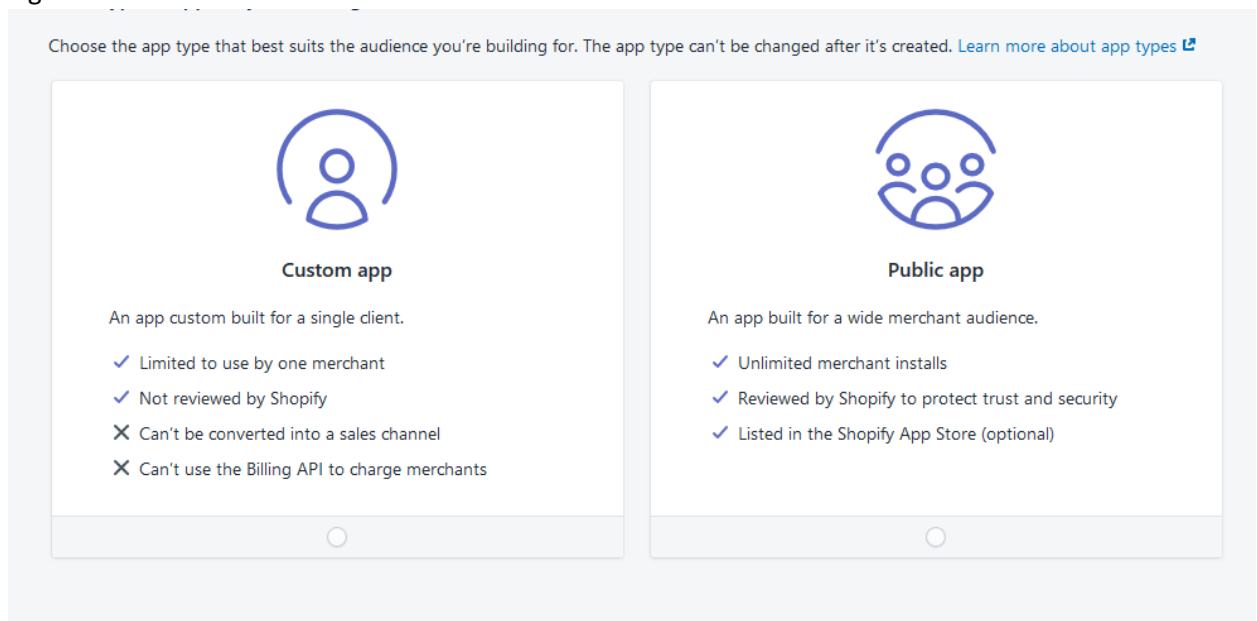

Figure 7. Custom App / Public App Selection screen.

4. a) Enter "Ms.Read Custom App" in the textbox under "App Name"
   b) Copy and paste the following URL into the textbox under "App URL"

   http://www.teamjello.com/install.aspx

   c) Copy and paste these 2 URLs in the textarea under "Whiteliested redirection URL(s)"

   http://www.teamjello.com/Auth.aspx
   http://www.teamjello.com/StoreData.aspx

   d) Refer Figure 8 to for end result.

Figure 8 – Complete App information entered.

   e) Click "Create App" .

5. After the app is created, please take note of 3 items in the App Setup Screen.
   a) API Key
   b) API Secret Key
   c) Generate Link
   d) Figure 9 shows the App Setup screen.
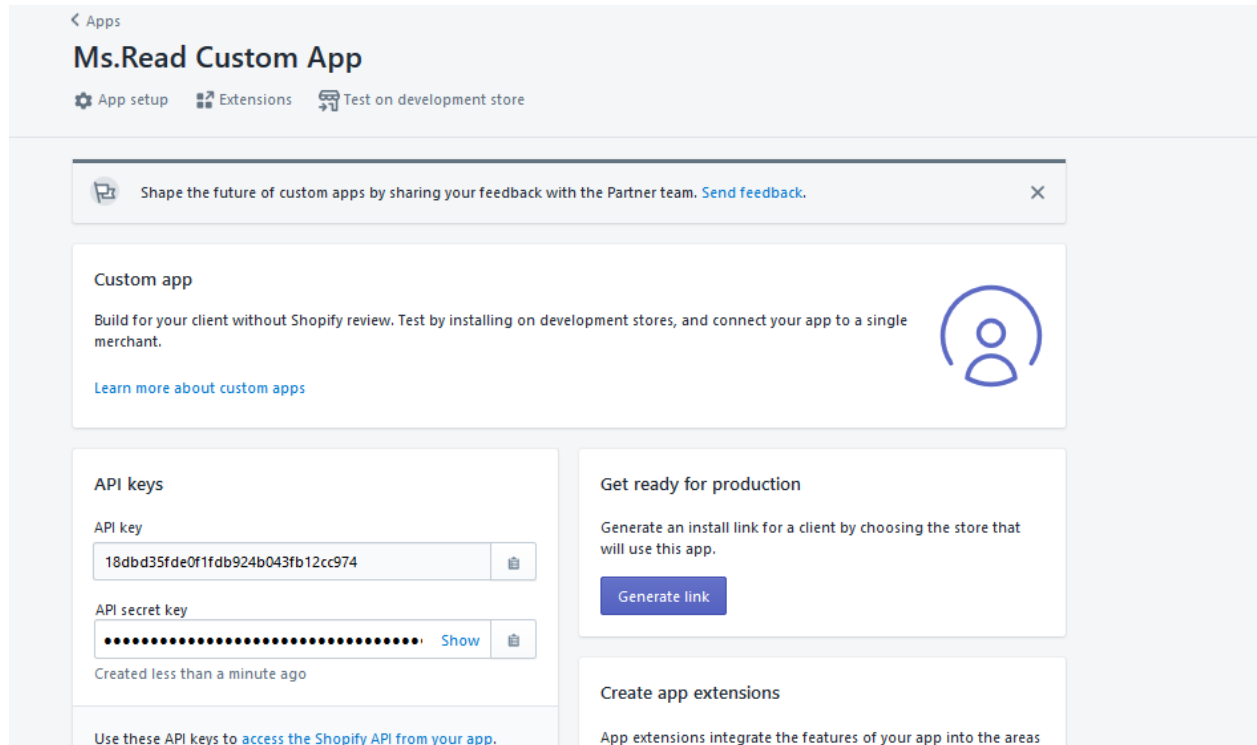

Figure 9 App Setup Screen.

6. Copy the values using the "copy" icon beside the textbox of "API Key" and "API Secret Key"
   Paste them into notepad.
7. Click on "Generate Link" then type in Merchant website URL in the textbox under "Merchant's
   myshopify.com domain". (Refer Figure 10)

Figure 10 . Generate Link page

8. Click "Generate Link". Please ensure that URL for Merchant site is correct. Once "Generate Link"
   is created. A pop up window will appear asking if the store URL is correct. Click "Generate Link"
   again.

9. You will be redirected to App Setup screen again. You should see "Your install link is ready". Click on "Copy install link" and paste the URL into notepad.
Refer Figure 11.

Figure 11. Install Link is ready.

Visual Studio Setup

1. Open Up Shopify API project. Right click Shopify API Project . Go Settings .

Figure 12. Shopify API Settings Dialog.

2. Copy the API key from "Step 5" in "How to create Shopify App" and paste in the "Value" part of "Shopify_API_key"
3. Copy the API Secret Key from "Step 5" in "How to create Shopify App" and paste in the "Value" part of "Shopify_Secret_Key"
4. Press Ctrl-S to save.
5. Done.
6. Deploy Application to teamjello website.

Install app from Shopify website.

1. After the app has been deployed by following the steps mentioned in "Visual Studio Setup".
2. Log in the merchant's website, eg. Ms Read Admin page.
3. Copy the Install Link mentioned in Step 9 of "How to create Shopify App" and paste the Browser URL after you opened the Ms. Read Admin page
4. Once the app is installed it should look something like when you click on the "Apps" on left menu

Figure 13 . "MsRead" is the installed app.

5. The Web API should be able to work
